Currently, Coca Cola no longer contains cola or coca nut extracts, and caffeine and seasoning ingredients are artificially provided. However, the nut continues to be used as a condiment in the food industry or as a stimulant in the form of food additives. The exception is not energy drinks that use natural natural drinks Coke's properties acuminaty. Prepare the rake for pepper as a base. This website is used to provide services, personalize advertising and analyze visits to suboric cookies. Information how you use these pages. This is the thorny story of coca leaves: their story began where the Peruvian forest rises to the South American great Andes. Coca leaves came out of the forest to the Andes and met the Andean people. The ink gave them life and turned them into their sacred plant. In the 19th century it was the first in the 19th century that there was a competition for tea and coffee, and they began to grow coca in bulk. Currently, coca leaves are banned by a UN decree. The ban applies all over the world, with the exception of the Andean countries. That's their story ... Coca is the original shrub from Andes. It grows to a height of 2.5 meters. It has small green leaves of elliptical shape. Coca grows on the warm and humid slopes of Desa from 800m to 2,000m above seateime, where the Amazon forest touches andes. Coca bushes can also grow hidden under taller trees (this is an interesting feature for a certain group of people who use it abundantly today). Coca leaves are harvested three times a year. Where they have the best conditions, they can be collected up to six times a year. Screaming Coca in Machu Picchu (Carlos Sotelo) Cocaine, the most important alkaloid in this plant, has a stimulating, anesthetic and therapeutic effect. In addition, it reduces hunger, thirst and fatigue. Cocaine is produced in small quantities by chewing coca leaves. Some alkaline substance should be used to facilitate the release of cocaine. In Tes most often used ash from quinoa plants, which gives tourists sweeter ash since the centenary. The history of coca-leaf leaves of the Inca Coca leaves were used only by Sapan Inca, his family and shamans throughout the empire. Ins had a monopoly on their distribution. Coca leaves have been taken because they reduce hunger, thirst and fatigue and allow people in Andes to walk or work long hours before returning home. The Spaniards learned about these qualities, and it was they who supported their use among all Andean Indians. People from Andes could work long hours without interruption on Spanish estates, or in gold and silver mines. Cocaine gets into pure cocaine for the first time from coca leaves in the 19th century. Around 1860, cocaine in crystalline form was admired as a wonderful and modern alkaloid of the late 19th century. In 1900, the U.S. largest user and popularizer of coca leaves and cocaine. Both products have been used in medicine, but also as part of various popular syrups. Eritroxidone Coca (Coca tea) is a gentle and complex stimulating drink that is comparable to black tea, or coffee, usually drunk in the United States. Pharmaceutical companies prepared various syrups that were used to treat both real and fictional diseases. Coca-Cola was the main medicine for the treatment of neural (chronic associated with rapid urbanization and competitive lifestyle), which was the most common disease of the golden American era in the late 19th century. Century. Love between coca leaves became immortal along with Coca-Cola. A drink they invented in Atlanta in 1886 that also contained cocaine. Around 1900, the U.S. imported 600 to 1,000 tone coca leaves per year. Almost all the products were from Peru.By the end of the 19th century, the production was from Peru. In the 19th century, cocaine was used as anesthesia even in complex cases such as eye surgery. In addition to the United States, German countries were also interested in coca leaves. Germans, Austrians and Swiss imported large coca leaves for the pharmaceutical industry. The most famous medical authorities who studied the coca effect were German: Dr. Albert Niemann is considered one of the discoverers of cocaine. Dr. Carl Koller studied their pain relief. Young psycho-pharmacist Sigmund Freud studied and used this drug a lot. Peru was a major supplier of coca leaves and cocaine from 1890 to 1905. Plantations were created in Peru, and trade helped the economy. The store was also part of national pride: The sacred ink plant conquers the world. From the miracle drug to the unseeded drug from 1900 to 1920, the U.S. attitude toward cocaine changed. In America, the more pleasant effects of the drug have plummeted. Cocaine has found interesting users: musicians, artists, visitors to horse racing, Hollywood, etc., but it has become like a crack and other variations, also a drug of black people. In the U.S., they decided to fight this drug hard. They have achieved a worldwide ban on the distribution of not only drugs, but also the main raw materials: coca leaves. Coca leaves have been on the UN's banned list since 1961, along with heroin and cocaine. In Peru, the entire industry went bankrupt (imagine Asia, now banning black tea). Currently coca leaves In Peru (but also in Bolivia. Ecuador and parts of Colombia and Argentina) you can buy coca leaves on the market. Coca leaves are legal. Indians in Asa chew them. I have never seen them on the market in Lima, but they are sold just like black tea in small bags in stores. After eating or eating at home, we drink tea in Peru. On the table are black tea, mint, Hierba Luisa (lemongrass), and mat de coca (tea from coca leaves). Coca-Cola tourists drink in Anes. This tea helps relieve Soro'e (disease from a height). When I went with the tourists, I noticed the driver putting coca leaves in his mouth after a few hours of traveling. Coca leaves provide people from Andes with various minerals that they otherwise don't have where to get from. For example, almost the entire dose of potassium. At Lima airport, they sell this tea, which will be taken as a souvenir by tourists. When I asked the saleswoman if there would be an export problem, she told me that she had heard that they had problems in Miami, but not elsewhere. Officially coca leaves, even packaged in tea, are banned all over the world, except in The Andean states, where we have enjoyed them with pleasure for hundreds of years. Peru has a body responsible for overseeing official coca plantations, which buys almost all production from farmers and sells it to the food or pharmaceutical industry. Coca leaves can only be exported for pharmaceutical purposes, but there is one exception: Coca Cola buys coca leaves through one company. Company. The company extracts cocaine from the leaves and prepares concentrate from coca leaves used by Coca Cola in its drink. Bolivian President Evo Morales has been fighting for years not to ban the use of coca leaves as part of a 100-year tradition. In 2009, during an interview at the United Nations, he showed a sheet of coca and chewed it. In 2013, the UN adopted an exception for Andean countries. Coca leaves (Carlos Sotelo)Ethnographic value People from Andes chew coca leaves when they work in the fields. Coca leaves also have a social function. When two Indians meet, one offers letters from his bag and receives the same letters from a friend's bag. That's how they honor their friends. Coca leaves are also used in various rituals, but they are also the primary remedy in Tesa. shaman (Carlos Sotelo) Otherwise in Arab countries alcoholic beverages are prohibited, I propose to ban there also grapes ...
