Works well on synthetic, silk and linenProdyuks many steamSoleplate remains hotLarge ReservoirReceivable easy to maneuverUseuse Customer Service Kindly Frigidaire You won't be left guessing when you're ready to iron with Frigidaire Affinity Steam-ProF115D7MR. This inexpensive device boasts an LCD screen that lists temperature settings, along with waiting and ready-made lights and sounds so you know when it's time for iron. Although it doesn't produce as much steam as some irons in our dough, Frigidaire still did a decent job of getting the creases out of synthetics, silk and flax. The sole has remained a lot hot for faster ironing, and a large tank will mean fewer trips to the sink to refill. Although it wasn't the lightest iron in our tests, we found frigidaire prone to tipping, so you want to be especially careful not to hit the ironing board. (The iron automatically turns off if it is tipped over on the side or face.) Manufacturer Guarantee: One Year Limited Review: October 2012Price When reviewing: \$59.00 This content is created and maintained by a third party, and imported to this page to help users provide their email addresses. You may be able to find more information about this and similar content piano.io Skip Navigation! Huw Jones/Photolibrary/Getty Images Unlock a Frigidaire oven door by pressing the Clear/Off button until the lock function is detached, allowing the door to open. Replay the lock by clicking the same button. Before you open the door, check the display screen for the words turn off and lock, and gently pull on the door of the oven Frigidaire. If the door is not locked, the same procedure locks the door. Press the Clear/Off oven button and hold until the word turns off any more on the display and the beep of the device. The lock itself can be detached for 15 seconds, and the door can be opened after the word Lock disappears from the screen. The locking function shuts down the control panel in addition to locking the oven door, working as a safety feature to prevent children from tampering with the device and potentially burning themselves or causing an accidental fire. If this method doesn't work, try turning off the switch in the oven by disabling the device, turning the switch back on and plugging the oven again to reset it. Another option is to activate the self-cleaning function of the oven and undo it after a few minutes before trying to open the door. If all these methods are unsuccessful, the Frigidaire oven may have a door latch problem. Contact the manufacturer for repairs. How can I trust these reviews about Frigidaire? Kelly Calgary, AB Verified Reviewer Original Review: September 4, 2020Sn least side by side refrigerator and freezer frigidaire Gallery, and we were surprised at how little fruit and vegetable crispers are. The freezer did not have a water line filter, and removing the bottom drawer is very difficult. The fridge is otherwise sufficient and I love how everything is easily within reach. Joe Taylors, SC Verified Reviewer Original Review: August 28, 2020Difficult evaluate the warranty, as we should never have used it. The same goes for customer service, there has never been a problem that requires customer service attention. All in all, a great device. We have had ours in operation now for over 20 years without problems. Will look for another one if we ever have to replace. Raymond of Soledad, CA Verified Reviewer Original Review: August 27, 2020Recently purchased a replacement top freezer refrigerator. The frigider was my choice! Good look and the right size! I recommend it. I got a 10% discount on the purchase. Satisfied. Registered it for a warranty!!!! Harold Lewistown, PA Verified Reviewer Original Review: August 23, 2020Bought it for sale, so the value for what you get was fair and it does the job. LED lighting keeps compartments well lit. At times you need to turn off the switch to relieve the ice dispenser and be the French door fridge it feels a bit awkward since we use to side by side. David Rose Hill, MS Verified Reviewer Original Review: August 22, 2020 We bought this Model Frigidaire a few years ago when our old one stopped working. I like Frigidaire products, they are usually well made and reliable and last for years. The fridge itself works well, I wish it had glass shelves and had a bit more, but that was all we could afford on our budget. We already had to replace the door handle, it has a weak spot near the top fastening. Although it serves us well otherwise, I just want us to be able to purchase more upscale models. Robert Waltham, MA Verified Reviewer Original Review: October 13, 2020This oven is not practical at all for everyday cooking. It needs constant cleaning or it looks like hell. The rubber feet under the grates have melted from year to year and go look for many worth to replace them. A year later the black paint in the back began to come off, despite all my efforts to be careful. The back should be porcelain so that it can be washed. The paint just sucks. The burners didn't even come close to heating evenly. It's really bad! If you're lucky and you have a really old stove, hold it. None of the modern furnaces seems suitable for intensive Parts wear out quickly and cost a fortune. I called Frigidaire and they wouldn't give me new rubber feet, but tried to sell them to me for the same high price. I hope they go out of business. Tina from La Vergne, TN Verified Reviewer Original Review: September 29, 2020I had to call them to set up the doors. During the second trip, I also pointed out Drawers. The wheels crack and fall. I have been informed that these parts are not being served under my extended warranty. It was a very cheap fridge but expensive. It's so crappy made. I bought this brand just because the rest of the appliances were in the kitchen when we bought this house last year. Never again will I buy one of their poorly manufactured refrigerator. If I want to fix it, I'll have to pay 187.00 to me to the repairman. He's a little over a year and a half old. There are 2 people in the house over 60, so he didn't abuse. I've never had a refrigerator repair in 40 years. One refrigerator lasted more than 20 years. Because it was a whirlpool. The serial number of the model FFHB2750TD 4A91210068. Now I'll go and you'll post other reviews as well as the BBB report file. Dennis Souderton, PA Verified Reviewer Original Review: September 25, 2020 We bought our Frigidaire dishwasher in August 2019. Immediately, the third rack, the top rack was difficult to close, constantly getting hung on the upper arm spin. Well, the back hand dropped, we had to order a new one, and remove the top rack forever. Last spring, a hose connection leaked, my husband replaced that as well. 5 days after the expiration of the warranty (1 year warranty) the middle hand spray fell. There is absolutely no way to attach it. I tried to contact Frigidaire, but calling them just running you in circles, back through the same recorded loop. The chat in the line doesn't work at all. I emailed on September 5th and the back response was that they are getting higher than the normal volume of emails, they will come back to me when they can! No response for 3 weeks with an email. I went on their Facebook page to comment on the lack of customer service and that their dishwasher is a waste of money. I noticed the message box opened and there were conversations with someone in the company. On 9/17 they messaged me that they would have a repair person to come out and the company would cover the work and parts, offered this once only, since she was out of warranty for five days when she broke again. I didn't hear from them, gave them dates that were convenient for us, which Frigidaire requested. Today is September 25th and I get no response when I post Frigidaire. So we spent quite a bit of money, never going to buy or recommend Frigidaire to anyone. Now I need to replace this shit with some equipment. Read the full review of Laurie West Orange, NEW JERSEY Verified Reviewer Original Review: September 23, 2020Please don't buy FRIGIDAIRE products. They are defective, customer service is not worth it on their products and it is very difficult to contact. The \$42 issue had not been resolved, which would make it difficult to submit a review. Brad Eilriya, OH Reviewer Original Review: August 29, 2020 We thought that Frigidaire was a really good brand. Friends and family were in the past. That's why we bought Frigidaire again to replace the last one that died on us. This one is not small, but storage space is just not enough. Too loud for our little kitchen. In addition, a lot of pho strange sounds, such as popping and gurgling, constantly throughout the night. Same style as the old same brand, but we lost storage space. It cost twice as much as the old one. It wasn't a money deal. I wouldn't recommend it to a friend and family member. Next how do you clear error codes on frigidaire affinity washer
